Professional Summary

Third-year B.Tech Artificial Intelligence student with hands-on experience in Python, data preprocessing, exploratory data analysis, and machine learning. Knowledge of supervised and unsupervised learning, regression, classification, clustering, and feature engineering. Experienced in building machine learning applications and working with financial market data. Seeking an ML/AI internship to apply technical skills and gain industry experience.

Education

Anurag University, Hyderabad, India

B.Tech in Artificial Intelligence

Expected 2028

CGPA: 8.5/10

Sri Chaitanya Junior College, Hyderabad, India

Intermediate – MPC

Technical Skills

Programming: Python, SQL

Data Science: Pandas, NumPy, Matplotlib

Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering

Deployment: Flask

AI: Prompt Engineering

Projects

PredictAI – Stock Price Prediction

- Developed a machine learning application to predict stock prices using XGBoost regression and financial market data.
- Performed feature engineering using technical indicators such as RSI, MACD, returns, and volatility.
- Built a web application for real-time predictions, prediction history, and model performance monitoring.
- Integrated model analytics and feature importance to improve prediction interpretability.
